Suffolk County Council: Basic Maths Premium Pilot

1. This annex is an addition to your 2018 to 2019 Conditions of Funding Agreement (The Authority), and relates to the additional funding associated with **THE AUTHORITY's** inclusion in the Basic Maths Premium Pilot.

2. The total level of additional funding will depend on the number of '*eligible maths students'* enrolled in the academic year 2018/19. For institutions allocated to a funding group not receiving all of the funding in 2019, the total level of funding will also depend on the number of students that go on to achieve in maths by summer 2020.

3. An *'eligible maths student'* is defined as a student enrolled on a 16 to 19 study programme for the first time without prior attainment of a maths GCSE grade 4 or above for the 2018 to 2019 academic year cohort; £500 of additional funding will be paid per eligible student. Students who are exempt from the condition of funding are not eligible.

4. The definition of achievement for the purpose of the pilot closely aligns to the condition of funding policy:

    a. students with prior attainment of a grade 3 in GCSE maths need to achieve a grade 4 or above in GCSE maths

    b. students with prior attainment of a grade 2 or below in GCSE maths need to achieve a grade 4 or above in GCSE maths, or a Functional Skills Level 2 in maths

5. It is expected the additional funding or incentive of additional funding will be used to drive improvement in outcomes for low attaining maths students. Institutions have flexibility over how to spend the additional funding to drive improvements in basic maths attainment. Institutions should use programmes and approaches that are known to be effective.

6. Institutions allocated to the funding group where the full additional funding is based on the number of eligible maths students will receive the additional funding by the end of March 2019.

7. Institutions allocated to the funding group where part (50%/£250) of the additional funding is based on the number of eligible maths students and the remaining part (50%/ £250) on the number of these students that achieve in maths by summer 2020 will receive the first tranche of the additional funding by March 2019. The second tranche of additional funding will be paid in the financial year 2020/21.

8. **THE AUTHORITY** in opting-in to the pilot agreed to participate in the evaluation to be carried out by NatCen. NatCen will be in contact over the pilot period to request input.

9. All purchases made in connection with this grant must be in line with **THE AUTHORITY's** procurement policy and procedure. **THE AUTHORITY** is expected to account for costs in relation to the additional funding. All expenditure must be accounted for to the same standards, rules and procedures as set out in Parts One, Two and Three of 2018 to 2019 Conditions of Funding Agreement (The Authority), and must be capable of independent verification and audit.

10. The DfE reserves the right, at any reasonable time, and as it may deem necessary to require **The AUTHORITY** to provide any additional evidence to support payments made under this Funding Agreement, as the DfE shall reasonably require.
